

Rain Check Contractor Positions

Interested in becoming a member of the Philadelphia Water Department's Rain Check team? Read the information below to see if you or your company is a good fit. We are always looking for qualified new contractors interested in making Philadelphia a more environmentally sustainable city.

Below are the basic requirements for becoming a Rain Check assessor or installer. The Energy Coordinating Agency (ECA) works for the Philadelphia Water Department (PWD) and manages the recruitment and training process for Rain Check contractors. All assessors and installers must sign a subcontract agreement with ECA must meet insurance and business license requirements to begin working in the program.

Applications are accepted on a rolling-basis. For questions, please contact Zach Popkin at zacharyp@ecasavesenergy.org or 215-609-1043. To apply, please send an e-mail stating your interest in the program and describing your relevant experience.

Rain Check Stormwater Assessors

Description: Rain Check assessors visit participant properties and evaluate the best way or ways to manage stormwater on the property. In particular, assessors look for the potential use of the five tools available through Rain Check (rain gardens, downspout planters, depave, porous pavement, yard trees). Following the site visit, assessors submit a completed report describing all feasible stormwater management tools within 5 business days of the assessment date. Requirements:

- Rain Check assessors must complete the Rain Check Assessor training sessions. Training sessions are scheduled on an as-needed basis and consist of 2 full days of classroom training.
- Demonstrated knowledge of residential stormwater management
- Background in engineering, design, planning, architecture, home building, home science, landscaping or green building.
- Ability to travel to all parts of Philadelphia
- Philadelphia Business License
- Proof of insurance, including:
 - o Commercial General Liability Insurance
 - o Workers' Compensation & Employers Liability Insurance
 - o Commercial Umbrella Liability Insurance
- Businesses located within the city limits of Philadelphia will be given preference
- Three references

Note: The amount of work provided through the Rain Check program varies considerably by season; assessor positions are not intended to be full-time.

Rain Check Installation Contractors

Description: Installation contractors may include landscapers, hardscapers, and general contractors who have previous work experience with small, residential projects. Contractors are responsible for installing stormwater management tools on Rain Check participant properties. Prior to the installation, contractors will be provided with an assessment report including photographs with guidelines for the installation.

Requirements:

- Rain Check contractors must attend Rain Check training sessions. Training sessions are scheduled on an as-needed basis and cover installation requirements for each of the stormwater tools offered through Rain Check as well as administrative guidelines for the program. If training sessions are not scheduled, a meeting with the Rain Check program managers is required.
- Demonstrated ability to install stormwater management tools. Contractors do not need to have experience installing all five tools. We can assign jobs based on contractor ability.
- Photographs documenting previous work
- Three references
- Ability to travel to all parts of Philadelphia
- Philadelphia Business License
- Proof of insurance, including:
 - o Commercial General Liability Insurance
 - o Automobile Insurance
 - o Workers' Compensation & Employers Liability Insurance
 - o Commercial Umbrella Liability Insurance
- Businesses located within the city limits of Philadelphia will be given preference

Note: The amount of work provided through the Rain Check program varies considerably by season; installation contractor positions are not intended to be full-time.
